Savage 8 HQ Quick Start

A companion to the working Life, Content and Money workspace

Savage 8 HQ gives you Life, Content, Money and Ideas boards with a weekly planner. It is an organizational workspace. It does not create your storefront, generate income, connect social accounts or automatically apply for jobs.

The current browser preview is free. Paid membership, subscription checkout and access controls are not included in this companion. Do not interpret a proposed price as an active subscription.

Start at https://melssavagesoul.com/hq/. Use one device and one test entry before adding your whole plan.

My first board

One test entry

Add an action with a finish line

Choose Life, Content, Money or Ideas. Write a short title and a next-action detail. Add a date when the action truly needs one. Use the status to distinguish work started from work completed.

Example: title "Guide listing"; detail "check the preview and write the delivery instructions"; target Friday; status To do. When the instructions exist and have been reviewed, mark Done.

Put sensitive personal or financial records somewhere appropriate, not in these general planning fields.

Title

Date

What Done means

Use the weekly planner

The planner brings dated moves into a weekly view. Check your capacity before adding more. A due date is useful only when the action fits your available time.

At the start of the day, select one life move, one content move and one money move. At the end, mark actual progress. If a task is blocked, name who or what it is waiting on.

The printable planner is a separate product. It can help offline but does not automatically synchronize with the website.

Three moves for today

Tomorrow's first action

Understand local and account storage

Without signing in, entries stay in this browser on this device. Clearing browser data, changing devices or losing the device can remove access. Download a backup before switching devices.

If you use the account sign-in option, account entries are stored separately from local browser entries. Local entries do not transfer automatically. Check that you can see the intended workspace after signing in.

Do not assume an account, paid status or cross-device synchronization exists just because a page looks familiar. Verify with a harmless test entry.

A seven-day starter routine

Day 1: add three moves. Day 2: complete one and update its status. Day 3: capture a content idea with a demonstration. Day 4: add a real inquiry or offer to Money. Day 5: review dates and remove impossible commitments. Day 6: save a backup. Day 7: review completed work and choose next week's three priorities.

Use Money amounts as planning notes unless independently checked. They do not replace bank, accounting or tax records. Separate promised income from received money.

For support, contact melssavagesoul@gmail.com with the page and problem. Do not email passwords, full account numbers or verification codes.
